

Overview of BEAM Plus Data Centres with Case Sharing for Government Data Centre Complex – Provisional Gold under BEAM Plus New Data Centres Version 1.0 (Pilot Version)

Introduction

BEAM Plus Data Centres is a green building rating tool tailor for certifying the sustainability performance of data centres. It assesses the design and construction of new data centres, as well as the operation and maintenance of existing data centres.

In this seminar, BEAM Society Limited will introduce the framework of BEAM Plus Data Centres v1.0. Representatives from Architectural Services Department and WSP (Asia) Limited will conduct a case sharing on the **Government Data Centre Complex**, which has achieved Provisional Gold rating under BEAM Plus New Data Centres v1.0 (Pilot Version).

Representatives from Electrical and Mechanical Services Department would also share the new editions of Code of Practice for Energy Efficiency of Building Services Installation and Code of Practice for Building Energy Audit with their applicable requirements for data centre, as well as the Energy Efficiency Registration Scheme for Buildings to encourage adoption of energy efficient building services installations in data centre.
